

Introducing TOOL: Theory- Oriented Object Laboratory

Mini-Workshop, Thursday,
November 7, 14.15-15.45 p.m.

Building X
X-A2-107

Organized by Lara Keuck
(History and Philosophy of
Medicine) and Lisa Regazzoni
(Theory of History)

What can we learn about theories, in particular theories of history and theories of medical knowledge, when studying objects? TOOL, the Theory-Oriented Object Laboratory, based in Room A2-107, is a new venue and collaborative project to address this question from various historiographical and theoretical perspectives, engaging with a variety of material objects and collections. We cordially invite all interested to join our opening workshop and discover more about TOOL, opportunities for participation, and ways to engage with theories through objects.

Program:

14.15-14.25: Welcome and Introduction to TOOL
14.25-14.35: Collections in the theory of history and the history of medicine and their use in TOOL
14.35-15.15: Speed Dating with Objects and TOOL researchers
15.15-15.45: Discussion and Coffee

Please register with Jovana Moldenhauer if you plan to attend the workshop:
