*Do you want explore the industrial and cultural heritage?*

*Are you curious to discover new places and learn to create interactive GIS maps?*

**Start your Adventure! Join Summer School in Ostrava (Czechia) in June 2025 and connect with students from across Europe!**

The program introduces an innovative method in gathering and interpreting information on industrial and cultural heritage. The course will teach you how to create an interactive Geographic Information Systems (GIS) map with number of information layers for comparative monitoring of social, cultural, historical and visual phenomena. The main task is to let digital technologies assist the protection of the memory of places; digital mapping of the vanished monuments, communities and visual objects; reconstruct the multi-structured history (digital history) and reconnect it with the presence.
