

ERC One Page Proposal

Objective of the Proposal:

The aim of the research is....

Background of the proposal:

- 1. What new knowledge will this research produce?*
- 2. Has this (new research) the potential to establish Europe as the leader in the scientific field-in terms of publication and citations in high impact journals?*
- 3. Is the proposed research really beyond the state-of-the-art? (Strong argument needed here)*
- 4. Why now? Why was this not done before now?*
- 5. Why you? Are you the best researcher to undertake this work?*

Overview of the proposed research and expected research results:

This section should describe the key research approach, methodology tools, data etc. It should also highlight the expected scientific results and how these would be used by other scientists.
